# Dairy contributes social, environmental and economic benefits

Dairy is an important component of healthy, sustainable diets

### Dairy's social contributions to health and sustainable food systems

Milk
9 essential nutrients

**Yogurt** 7 essential nutrients

**Cheese**6 essential nutrients

- Associated with strong bone health
- Associated with reduced risk of cardiovascular disease, type 2 diabetes, high blood pressure

Protein Phosphorus Pantothenic acid

Calcium Vitamin A Niacin

Vitamin D Riboflavin Vitamin B12

## Dairy's environmental contributions to health and sustainable food systems

- Responsible production and progress
  - Commitment to continuous improvement in sustainability and stewardship
  - Voluntary goal to reduce GHG by 25% by 2020
- Humane, ethical animal care--FARM
  - ●98% of U.S. milk comes from farms in the Farmers Assuring Responsible Management (FARM) animal care program.
- Giving back to the land
  - Sustainable practices—manure management, recycling water and no-till farming

### Dairy's economic contributions to health and sustainable food systems

- Committed to serving communities
- Milk is produced in every state; most milk travels ~300 miles and 48 hours from farm to store
- The dairy community supports 3 million jobs and contributes \$625 billion to the U.S. economy every year
- 95% of dairy farms in the U.S. are family owned and operated
- 37 million dairy farms globally are led by women
- Livelihoods of 1 billion people are connected to dairy
